Back-End Developer focused on building scalable APIs and efficient data processing systems using Node.js, TypeScript, and .NET.

PROFESSIONAL EXPERIENCE

City Hall of Maranguape – CE — *Back-End / Full-Stack Developer*

NOV 2024 – NOV 2025

- Developed an Employee and Organizational Structure Management System handling large datasets and complex hierarchies.
- Standardized file upload workflows using Multer + AWS S3, eliminating recurring upload issues.
- Designed hierarchical sector structures using MongoDB aggregations.
- Implemented automatic PDF report generation, reducing creation time from minutes to seconds.
- Built scalable APIs using Node.js + Express with clean architecture and layered services.

Agilize Contabilidade — *Back-End Developer (Freelancer)*

MAY 2025 – OCT 2025

- Developed a tax document processing system automating extraction and validation of DARF and DAS files.
- Reduced operational workload by approximately 10 hours per month.
- Built batch processing pipelines with strong validation and error handling.
- Created a financial reconciliation system for OFX files using .NET 8 and PostgreSQL.
- Implemented automated classification logic to reduce repeated manual categorization.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, Express.js, .NET 8, C#, REST APIs, SOLID, Clean Architecture

Databases: PostgreSQL, MongoDB, SQL, NoSQL modeling, query optimization

DevOps & Cloud: Docker, GitHub Actions (CI/CD), AWS S3, Redis, Git

Frontend: React.js, Vue.js, TypeScript

Other: OWASP practices, refactoring, technical documentation

EDUCATION

Associate Degree in Systems Analysis and Development

Estácio — Expected completion: July 2027

LANGUAGES

Portuguese — Native

English — Advanced (professional working proficiency)
